

MULTI-WASTE

Multi-Waste (Jet Park) (Pty.) Ltd is a significant regional provider of services within the waste management sector.

We recognise that we have a moral and legal duty of care towards protecting the environment in which we operate and that our sustainability will be, in part, determined by the success of our stewardship of the environment.

Our environmental policy is established on the acknowledgement that our activities impact upon the environment in which we operate and that we have a duty of care to minimise these impacts-we want to “tread lightly” wherever we operate. To this end, we will:

- ensure that our environmental impacts are assessed at the planning, design and delivery of our services so as to minimize any pollution and negative impacts whilst maximizing positive impacts;
- comply with environmental legislation relevant to the services we provide;
- continually improve our environmental conservation performance through establishing objectives and regularly reviewing our performance achieved;
- implement environmental management systems to measure compliance and performance;

ENVIRONMENTAL POLICY

- increasingly improve the energy efficiency of our activities, decrease water usage, reduce waste and improve recycling;
- ensure that all our employees are trained so that they are competent to ensure that the environment is not detrimentally affected by their work activities;
- ensure that our suppliers pay due regard to matters of the environment;
- provide the resources necessary to ensure that our environmental policy objectives are met;
- ensure that employees and other interested parties are aware of our environmental policy and seek their support in achieving the aims of the policy

Peter Dolan
